FOR IMMEDIATE RELEASE:

**PLANET TECHNOLOGIES AND CONCEPT SEARCHING TO WORK TOGETHER TO DELIVER
ENHANCED SEARCH CAPABILITIES FOR MICROSOFT CLIENTS**

Germantown, Maryland –April 28, 2008 – Planet Technologies, an International IT services and consulting company, and Concept Searching, a global automatic classification and taxonomy management software company, have formed a partnership to provide enhanced search, automatic classification, meta data generation, and taxonomy management capabilities to Microsoft clients worldwide.

Planet, a Microsoft Gold Certified Partner, and Concept Searching are combining their expertise to extend the capabilities of SharePoint Products and Technologies. Concept Searching products integrate with Microsoft Enterprise Search, Microsoft Office, the Business Data Catalog and the Microsoft Records Center to improve the classification and retrieval process for organizations that require access to unstructured information. Planet will offer its Microsoft clients high-quality services, including installation and integration of Concept Searching products.

Utilizing the compound term processing for concept extraction, the classification and taxonomy management technologies deliver the optimal solution for organizations seeking to capture and unlock their information assets. The ability to classify and see ‘concepts in context’, significantly increases relevance and precision enabling organizations to increase productivity, reduce costs and gain competitive advantages.

“We are excited about our new relationship with Concept Searching which will give us the opportunity to offer a unique and robust solution to our Microsoft clients looking to improve business processes in any application that requires access to unstructured information,” said Scott Tucker, CEO and President of Planet Technologies.
